

Product safety & consequences

SUE report card - Aerospace & Defense | Product quality, safe use, export controls, end-use governance
530 of 3371 passages are about this category (PCA projection)

KEY PASSAGES (the evidence the verdict leans on)

[1] AEROVIRONMENT INC - 2025 AeroVironment_2025_Corporate_Social_Responsibility_Report.pdf (p.16) - score 0.68

ategic advantages across every domain of modern warfare. We do this in support of the defense of democracy and to protect innocent lives. We remain committed to ensuring that our employees, value chain partners, and customers are mindful of how our products are intended to be used. However, we recognize that there are risks associated with the inappropriate use of our defense technologies, especially if they are sold...

[2] Textron - 2025 Textron_2025_Corporate_Responsibility_Report.pdf (p.31) - score 0.65

istrative bodies. To ensure compliance with these standards and laws, TSV assesses quality and safety throughout the design, manufacturing and finished product stages, which includes comprehensive testing of product design, components and finished products. When safety or quality issues arise during product development and manufacturing, or on products that have already been sold, TSV utilizes a multidisciplinary rev...

[3] AEROVIRONMENT INC - 2025 AeroVironment_2025_Corporate_Social_Responsibility_Report.pdf (pp.16-17) - score 0.65

also responsible for applying export controls to AV's products and technologies, obtaining and administering licenses, and screening all parties we interact with as an enterprise. We also mandate trade compliance training, and through the end of fiscal year 2025, 97.5% of employees completed these trainings. 97.5% OF EMPLOYEES COMPLETED MANDATED TRADE COMPLIANCE TRAINING THE SAFE OPERATION OF OUR PRODUCTS THE SAFETY ...

[4] GE Aerospace - 2026 GE_Aerospace_2026_Sustainability_Report.pdf (pp.9-10) - score 0.64

rationsT echnologyIntroduction GovernanceSafety People Data tables Product safety and quality Given the central importance of product safety to the company, our Board of Directors provides regular oversight of and engagement on product safety and quality. The design and production of our commercial engines are governed by some of the most stringent regulatory regimes globally, with oversight from the U.S. Federal Avi...

VERDICT

GE Aerospace leads the peer group on product safety & consequences (depth 0.58 vs. group tail 0.45), and its passages above are noticeably more concrete than the group norm. Credit where due: GE Aerospace goes beyond the standard report here, publishing a dedicated climate/TCFD report and a standalone data supplement - over-delivery of this kind is a stronger signal than polished prose.
